

Goal of this analysis is to give a regular and quick overview where all countries world wide are on their respective Covid19 development/curve

Exemplary Covid19 Scan for all Countries

Remarks:

- Color of the 2-letter code indicates if since last snap shot the country has shifted up (green) or down (red) or remained (blue) in the cluster
- Within each cluster, countries are sorted according to population size, i.e. countries with large population are displayed before countries with smaller population

Method of clustering – according to the detailed rules for each cluster (for details see below) each country is sorted into a cluster – some examples
